

Guidelines for Credit Transfer

1. Courses/credits that you intend to transfer must be related to the field of Chemical Biology and Molecular Biophysics.
2. Courses/credits that you intend to transfer must be taught in English.
3. The degree of difficulty in courses should be identical.
4. The number of credits of courses must be equal to or be less than the original courses taken in other universities/institutes when making credit transfer.
5. The courses should be graduate courses.

****Please note that whether or not your application will successful lies on the rule of the department that you register to and the joint decision of curriculum committee and student affair committee.**
